

CSC 2310 – Spring 2016
Homework #6
Due 22/4/2016 11:30 pm

Submission Requirements

*You must turn work at the SPECIFIED TIME so you can receive credit for Homework! Homework 5 **must be submitted on brightspace** by the due date and time. Late homework will be subject to a penalty, as stated in the course grading policy. No email or hard copies of homework will be accepted.*

*You may discuss the assignments with other students in the class, but (as stated in the academic honesty policy) your written answers **must be your own**, and you must list the names of other students you discussed the assignment with.*

1. (Question PP 6.4 from book) Modify the *Fahrenheit* program so that it displays a button that, when pressed, causes the conversion calculation to take place. That is, your modification will give the user the option of pressing Enter in the text field or pressing the button. Have the listener that is already defined for the text field also listen for the button push.
2. (Question PP 6.8 from book) Develop an application that implements a prototype user interface for composing an email message. The application should have text fields for the To, Cc, and Bcc address lists and subject line, and one for the message body. Include a button labeled Send. When the send button is pushed, the program should print the contents of all fields to standard output using *println* statements.
